and lungs, is a consideration which should impel every prudent person to keep at hand, as a household remedy, a bottle of AYEP'S CHEEPLY PECTORAL.

Nothing else gives such immediate railer and works so sure a cure in all affections of this class. That eminent physician, Prof. F. Sweetzer, of the Maine Medical School, Brunswick, Me., says:—

"Medical science has produced no other anodyne expectorant so good as AYER'S CHERKY PROTORAL. It is invaluable for diseases of the throat and lungs." The same opinion is expressed by the vell-known Dr. L. J. Addison, of Chicago,

AYER'S Cherry Pectoral

Is not a new claimant for popular confidence, but a medicine which is to-day naving the lives of the third generation who have come into being since it was first effered to the public.

There is not a household in which this invaluable remody has once been introduced where its use has ever been abandoned, and there is not a person who has ever given it a proper trial for any throat or lung disease susceptible of cure, who has not been made well by it. AYER'S CHERRY PECTORAL ons, AYER'S CHERRY PECTORAL nas, in numberless instances, cured obstinate cases of chronic Bronchitis, Larnygitis, and even acute Pracumenia, and has saved many patients in the earlier stages of Pulmonary Consumption. It is a medicine that only requires to be taken in small doses, is pleasant to the taste, and is needed in every house where there are children, as there is nothing so good as AYER'S CHERRY PECTORAL for treatment of Croup and Whooping Cough.

These are all plain facts, which can be These are all plain facts, which can be re-rerified by anybody, and should be re-nembered by everybody.

Grain is firmer and higher all round, May sales being made in all departments. Otherwise there are but slight changes from yesterday's values. The opening and closing prices of the day were as follows:

"The whole question of future wheat values," said George Bacon to-night, "rests." entirely with the movement from the in-terior. As long as this continues so free any strength can be but temporary, but as oon as receipts decrease, which may not be until after the holidays, I shall expect permanently higher prices for the balance of the crop."

Cables still continue to come in firm,

but there seems to be a certain distrust about the advance abroad being genuine, and some of the bears claim the late apparent strength, both here and there, is due to the efforts of a prominent house here, who were left with over 3,000,000 bushels of wheat on hand by the failure of a large English grain house, and are endeavoring to work the market to dispose of it withment in the British market is not more than equal to the advance in ocean ripments of miscellaneous produce. Hence they claim there is nothing to in-duce increased exports, or to encourage higher bids from European dealers, and advise their friends to purchase only on sharp breaks and take profits on bulges. The local situation is also further aggra-vated by free realizing on the part of Han-cock, Comstock, Hatton and the scalpers who loaded up the latter part of last week in anticipation of a good advance, which failed to come, and the dumping of the aids takes the courage out of many bulls.

Still, on the other hand, there continues to be a good demand for carrying at ic premium for January, and 7 ic for May, and Robert Lindblom, who is supposed to be heavily long, said to night:

"Of course it cannot be expected that our wheat market will turn decidedly bellish of the said of the bullish after being bearish for over a year. Receipts have been heavier than year. Receipts have been heavier than expected and the decrease in spring arrivals is not so large as it might be. What this country needs is for the disappointed newspapers and politicians to stop croaking. The weakness is due entirely to lack of confidence, which is being undermined by the unreasonable doings and sayings of financial optimists. Wheat is gaining friends every day. The visible supply is large, but the invisible supply in front of us is small. One offsets the other, and low prices will decide the contest."

Corn is neglected. Receipts continue free, but it is thought by many that they will soon show some decrease, Western shippers being, it is alleged, unable to buy at country points profitably. Jim Love is the most prominent seller, while George Eldridge is buying the deferred futures quite freely. May and January hold their own, with scarcely a sag, and it is noticed that some old and shrewd operators are buying these and selling year, on the theory that carrying charges must be paid before long.

Provisions rule slumpy. The selling must be paid before long.

Provisions rule slumpy. The selling seems to be in sympathy with the weakness of the market for hogs, for which there would seem to be no cause, inasmuch as receipts of the live animals, so far this season, are considerably below those of recent former years. Packers, however, instead of being sellers, are hoverer of the outloops and as they take in buyers of the options, and as they take in all the bogs many look for an early im provement in the market for products.

St. Louis Grain and Provision Markets, SPECIAL TO THE APPEAL. St. Louis, December 2.-The provision market developed a steadier tone to-day, though sellers were unable to secure any advances. On the contrary lard fell off a noon, when values eased off. Corn was also firm at ic below yesterday's close for Breadstuffs rule steady. Potatoes and onions are higher.
